## Introduction :

# 88 years of good Service

Bin Harkhil Co Ltd. based its main office in Jeddah, K.S.A, founded in 1930 as a noble conventional trading co and over the decades of multi-dimensional activities in socio-economical front, it has been grown as stand-alone strategic business units in the field of Engineering design, Steel fabrication & Precisions, Manufacturing, Mining, Quarrying & Construction industries.

The state of the art technology focused on ergonomics coupled with trained and dedicated staffs, create values and embellish our facility where our stakeholders are being benefitted and continued to choose our durable and quality products and services.

Our array of products and services lines in more discrete, consist of Granite & Marbles from owned Quarry/factory

- Aggregates for concrete from owned crusher
- Crushing Machine & Spare parts
- Conveyor system & Spare parts
- Screening Machine & Spare parts
- Drilling Machine Spare parts & consumables
- Construction machine & Spare parts
- Earth Moving Equipment & Joint cranes rental
- Auditing of crushing plant design
- Designing of Stationary crushing & screening plant and conveyor system.
- Construction of Quarry
- Steel fabrication & metal facility

Our approach to our valued customer is based on a philosophy "Treat best & Serve better" with Quality and Pride where we really mean to establish trustworthiness and loyalty in every facets.

### About Us

Bin Harkil Co. Ltd. strives to offer a full integrated exploration, drilling, engineering and mining services for the mining sector in an economical and professional manner and to develop and support every aspect of our business with the highest level of integrity remain dedicated to our clients as business partners.

# What We Do?

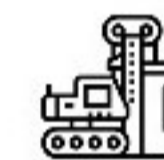

### SURVEY

Surveying ground control points and drill collar locations

### SAMPLING

BH is capable of carrying out samples preparation.

### DRILLING

BH is able to provide a quality drill and blast service

### HAULAGE

Choosing high-performance transportation solutions allows miners to drive overall productivity and efficiency.

### CRUSHING & SCREENING

BH can supply key contract of crushing and screening services for mines, quarries, cement plant & excavation sites.

Loading and haulage are fundamental to both surface and underground mining operations. Miners use loaders and haulage carriers to not only transport the run-of-mine (ROM) ore to the processing area but also remove overburden and waste rocks from the mine site.

Proper fleet selection by determining the suitable type, size, and the required number of loaders and trucks is a strategic mine planning decision that can maximize production efficiency and minimize capital and operational costs.

Bin Harkil provides services ranging from individual consulting through complete "turnkey" operations. In other words, you can hand over your project to us, and we will take it from there.

# Our Business: Crushing Plant , Spareparts and consumable

In mining operations, the layout of crushing plants and ancillary equipment and structures is a crucial factor in meeting production requirements while keeping capital and operational costs to a minimum.

Binharkil's fundamental goal for the design of a crushing plant is an installation that meets the required production requirements, operates at competitive cost, complies with today's tough environmental regulations, and can be built at a reasonable price despite the rising costs of equipment, energy and construction labor. As we are customer-oriented company, that provide high end technologically advanced products & services for crushing & mining industries to protect & preserving the natural environment as well as their time & money through our services & products like Drone based surveying, Calculated blast management, reverse engineering based NON - OEM spare parts, Metal Detectors Machine, Dust separation equipments such as fog cannons & dust separation trucks.

## **BIN HARKIL TURNKEY & MOBILE CRUSHERS PLANTS**

A turnkey project is a type of project that is constructed so that it could be sold to any buyer as a complete product. This is contrasted with build to order, where the constructor builds an item to the buyer's exact specifications, or when an incomplete product is sold with the assumption that the buyer would complete it.

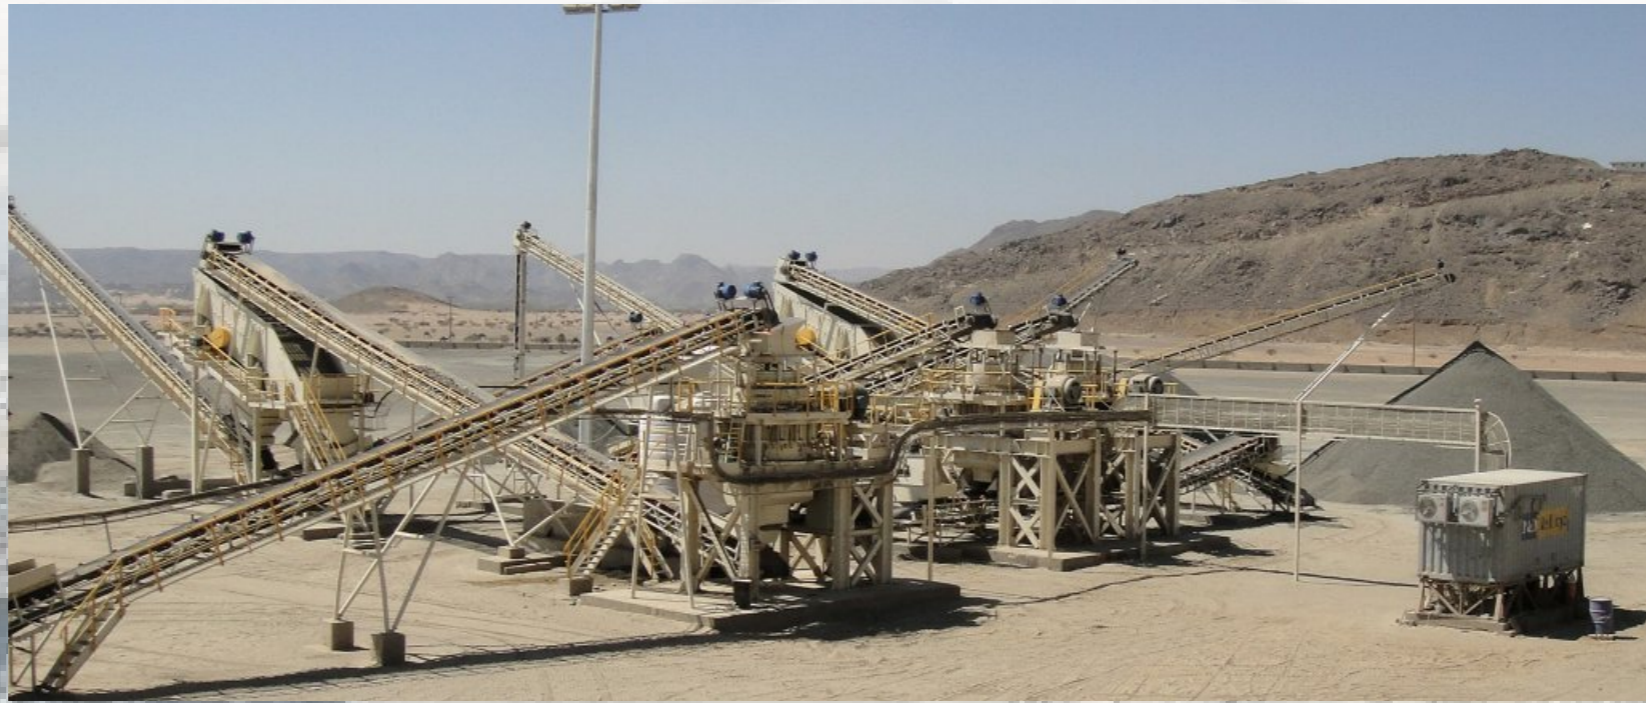

Primary crushing is the first stage of material reduction and can sometimes be the only stage needed to generate the desired product for a job. Depending on the setup, primary crushing will take the larger material that has been blasted, excavated, or reclaimed and process it through an impactor, jaw, or gyratory crusher to generate a range of product sizes.

For many aggregate producers, utilizing a closed-circuit portable crusher plant with scalping and screening capabilities can be all they need to create the product they need. But when a wider variety of product is desired and certain material is being processed, like concrete and asphalt, it can be valuable to rely on additional stages of crushing, like secondary and tertiary.

# We're taking you into the process

We aim to make part identification, ordering, supply, and demand planning as smooth, efficient, and cost-effective as possible. When choosing spare parts for your crusher, think quality and long-term. Bin Harkil's parts division keep your crusher working at peak performance. Correct spare parts are critical to the successful operation of any process equipment, our genuine parts, herefore outperform imitations and with a longer lifetime, saving time and costs.

Secondary crushing, is the second stage of material processing following its initial reduction. At this stage, material will flow through perhaps a second impactor or even a cone crusher, which is effective at breaking down these types of material.

## Crusher Spareparts and consumables

When choosing spare parts for your crusher, think quality & long-term. Bin Harkil's parts division keep your crusher working at peak performance. Correct spare parts are critical to the successful operation of any process equipment, our genuine parts, herefore outperform imitations and with a longer lifetime, saving time and costs. Our customized spare parts solutions help you improve equipment reliability and availability, and support you in optimizing plant performance and total cost of ownership. Our goal is to build a proactive partnership with you based on a deep-

understanding of your operations. We aim to make part identification, ordering, supply, and demand planning as smooth, efficient, and cost-effective as possible.

When choosing spare parts for your crusher, think quality & long-term. Bin Harkil's parts division keep your crusher working at peak performance. Correct spare parts are critical to the successful operation of any process equipment, our genuine parts, herefore outperform imitations and with a longer lifetime, saving time and costs.

## Drilling Solution

Bin Harkil Co. Ltd. is a distributor of Rock drilling equipment, tools and accessories used in inter-national mining sector, quarries, cement and construction sector, we are one of the leading suppliers of its field, with 30 years of experience. We would like to introduce ourselves as a leading supplier of Rock Drilling Equipment's, Tools, and Accessories & Precision parts for Rock Blasting & Mining Industry in KSA. We supply Rock Drilling Equipment (Drill Rigs), High Quality Tools (like but-ton bits, Shank Adapter, Coupling, Ext.Roads etc.) and accessories for top hammer drilling & DTH drilling from the most trusted brands Robit (Finland). The Products have been tested, approved & trusted by most of the customers across the Kingdom of Saudi Arabia for its high performance & cost-effective production. We also supply Drifters & drifter parts (both hydraulic & pneumatic) compatible with almost all the brands like Sandvik, Atlas Copco, Epiroc Ingersoll Rand, Furukawa, Junjin CSM, Tamrock, Soosan CSM etc...

**DRILLING TOOLS & EQUIPMENTS DTH HAMMERS & DRILL BITS FOR USE IN QUARRIES FOR BLAST HOLE DRILLING.**

Heavy duty and Reliable with most popular International shank designs compatible with Atlas Copco, Ingersoll Rand, Sandvik Drill tech Mission etc,

Bin Harkil supplied products meets international quality standards & specifications. BUTTON BITS & TRICONE ROCK BITS compatible for all major International brands.

# Our Business:

## Bin Harkil Granite Factory

Granite is one of the well known igneous rock that can be found on the earth's surface. Because of its unique composition and its characteristics many manufacturers are searching for the best type of granite to make it into a different object that we can encounter in our daily life. This includes Kitchen counter tops, floors, walls paving stone, curbs, steps and risers.

Najran Tropical Brown is commonly found and the well known granite in Saudi Arabia, particularly in Najran. This granite has a combined brown with a black crystals and a lighter greenish brown.

Bin Harkil Granite Factory has its own quarry site for the Najran Tropical Brown.

Bin Harkil Granite Factory is the latest and youngest plant in Saudi Arabia it has own two quarries located at Bin Askar & Ruwaida in southern and central part of Saudi Arabia. It has been delicately choosing to provide the client with a high quality products with best finishing, the plant is fully mechanized between different machinery to maintain the high productivity which ensures the delivery of the items on time. And our ownership of various granite quarries is giving us full control of the process, quality, and delivery. We value and appreciate the trust given to us by our local and global customers since the commencement of our activities. Bin

Harkil Granite is a reliable natural stone source serving architects, contractors, builders, and wholesalers. And we earned a high degree of credibility with our client base as the most reliable and consistent supplier. To provide faster action to support customer projects, we established a warehouse in Jeddah & Riyadh and planning for more. Our product is

satisfactorily delivered to Kuwait, Qatar, UAE, Oman, & Bahrain. We also have served customers in Europe, North America, North Africa, and the Indian Continent.

**GRANITE FINISHES**

- \* Honed
- \* Polished
- \* Flamed
- \* Sand Blasted
- \* Leather Touched
- \* Bush Hammered
- \* Flamed & Brushed

BIN HARKIL GRANITE is emerged and recognized as one of the leading manufacturer of Granite with its array of classic products in and out of the kingdom.

Should you require a radical change, then, we are there to match with the construction industry requirements by offering our variety of Granite products. Our factory is equipped with state of the art technology to meet the high quality standards and services towards the client's wants and needs.

We are dedicated to take the challenges and satisfy our clients by rendering our fullest support and services in technical and after sales.

# Our Business: Engineering and Design

## QUALITY OBJECTIVES

Bin Harkil Company Ltd. Top Management ensures that quality objectives, including those needed to meet requirements for product, are established at relevant functions and levels within the organization. Annually, Top Management will define goals and objectives that will be utilized to measure the suitability and effectiveness of the Quality Policy.

The goals and objectives will be tracked and collected by the responsible managers and be formally evaluated by Top Management during the Management Review meetings as a basis for continual improvement.

## BH VISION

To be the supplier of choice in every industry we serve.

## BH MISSION

To continue to be the leader in our industry through individual and combined dedication, innovation, and integrity.

## Transforming Materials into Shapes

### ENGINEERING AND DESIGN

We blend skills and professionalism of our engineers, estimators & draftmen to connect the demand of geometry, material, loads and ultimately to satisfy our customer with a stable, durable, elegant and economical engineering & design to transform the project.

Our expertise extends to, but is not limited to:

- \* Consultation and preparation of specification
- \* Project management and site supervision.
- \* Site measurement and surveying.
- \* Drafting (we offer a complete drafting service from concept drawings to detailed shop drawings).
- \* 2D AutoCAD.
- \* General arrangement and layout drawings.

## REVERSE ENGINEERING AND PROTOYPING

Reverse engineering gives the space to replicate or prototype the given part by capturing the component's physical dimensions, features and material properties.

The components to prototype are disintegrated, examined and analyzed in discrete details by undergoing destructive test in our sophisticated lab to aware chemical, mechanical and metallurgical properties.

The rapid prototyping is capable to quickly create three dimensional parts with complex geometries by using 3D printing – Additive Layer Manufacturing Technology.

# Our Business: Steel Fabrication works

Our Steel Fabrication Division provides a thousands of tons of high quality Heavy equipment attachments and structural steel projects annually to construction, Mining and Crushing plants and other firms through out the kingdom.

With state of the art in house facility we are able to deliver fabricated steel for specific and general industries, by applications of quality assurance control and procedure, Bin Harkil ensure top quality fabrication of structural steel, plate works, piping and machined components of a total project. We further provide metal service, such as plasma cutting steel plate, drilling, milling and steel forming.

Bin Harkil has a covered fabrication facility of 7,500 Sq.meters with state of the art technology focused on ergonomics coupled with trained staffs and end to end quality management. It is our pride to associate and supply tons of fabricated steel to our business partners for their specific and general purpose requirements in the field of infrastructural, mining and industrial plant construction.

We carry inhouse project detailing works, full erection prior to part work for clients inspection and approval for delicate plant part to avoid site rework or delay, regardless of height or weight.

# Our Business: Mining Equipments and Contracting services

Construction and Mining companies throughout Kingdom of Saudia finds Bin Harkil as first choice for earthmoving rentals ,among the available models in our rental fleet , you 'll find heavy -duty construction equipment from some of the best brands in the industry , including wheel loaders and articulated haulers from Volvo, crawler carries from Komatsu , backhoe loaders from CAT, excavators from Bobcat ,and dump trucks from Mercedes , MAN & CAT. All our construction equipment rentals are maintained in excellent working condition by our highly trained service team. You know you can count on quality with Bin Harkil Company.

## TYPE OF MACHINES AND EQUIPMENTS

- CATERPILLAR 770
- CATERPILLAR 980H
- CATERPILLAR 966H
- CATERPILLAR 988H
- EXCAVATOR (CAPACITY 20-90 TONS) RIGID
- DUMP TRUCK (CAPACITY 36 TONS)
- TELEHANDLER
- BOBCAT MANLIFT
- FORK LIFT CAPACITY 3-15 TONS ALL
- TERRAIN CRANES SUCH AS:
  - \* 50 TONS CAPACITY
  - \*100 TONS CAPACITY
  - \*160 TONS CAPACITY
  - \*200 TONS CAPACITY
  - \*250 TONS CAPACITY
- TOWER LIGHTS
- DTH RIG MACHINE
- TOP HAMMER DRILL RIG
- UNDERGROUND DRIL RIG
- SCREW COMPRESSOR
